Executive Summary

## Executive Summary

April 14, 2025—This is an executive summary of the fiscal year (FY) 2026 tentative budget for the Metropolitan Water District of Salt Lake & Sandy (“Metro Water”).

The budget includes a total budgeted revenue of \$111.4 million. The revenue is based on a projected certified property tax rate of 0.00035 and bond revenue proceeds of more than \$30 million. Budgeted revenue includes a 5% increase to the member cities’ water sales fixed charge (\$/month). A 5% increase for non-member city water rates is also budgeted. Future water rate increases are anticipated to be 6% in FY27 and FY28, and 7% through FY 2030. Projected rate increases are shared with member cities.

Total budgeted expenditures are \$111.4 million. This budget includes more than \$27 million for routine non-capacity improvement projects with a significant portion for the Cottonwoods Connection project. The Operations and Maintenance (O&M) budget totals \$40.5 million (excluding interest, depreciation, and amortization) and includes non-routine O&M costs, all Provo River Water Users Association costs, and Salt Lake City’s portion of the Cottonwood Connection project. The O&M budget represents a 9.5% increase (excluding Salt Lake City’s reimbursement) due to costs from other agencies, increases in utilities (gas and power), and increased personnel costs for workload and succession planning needs.

Escalating assessments for Central Utah Project (CUP) Operation, Maintenance, and Replacement (OM&R) costs and related reserves is increasing Metro Water’s total O&M budget. Expenses related to CUP OM&R and associated reserves are forecasted to increase by \$5 per acre-foot over the next several years based on decisions of the Central Utah Water Conservancy District. The forecasted increases are as follows (cost per acre-foot):

- FY 2026: \$75.00 (7.14% increase)
- FY 2027: \$80.00 (6.67% increase)
- FY 2028: \$85.00 (6.25% increase)
- FY 2029: \$90.00 (5.88% increase)
- FY 2030: \$95.00 (5.56% increase)
- FY 2031: \$100.00 (5.26% increase)

The total FY 2026 capital budget is \$37 million. The total debt service budget for FY2026 is \$24.6 million, including bonding for the design of the Little Cottonwood Water Treatment Plant Rebuild Project and administration campus improvements. Reserves are projected to increase by \$9.1 million.

As previously noted, the tentative budget includes an increase of four FTEs (full-time equivalents), one temporary FTE for succession planning, and a 4% COLA/merit salary increase. The benefits plan includes Metro Water employees paying for 5% of the medical insurance premium.

The projected annual allotment for the Provo River Water Project supply is 100%

**Department:** Engineering **Location:** Salt Lake Aqueduct  
**Project Contact:** Kelly Stevens **Request Type:** Non-Capacity Improvement Project

**Title:** Salt Lake Aqueduct Replacement Reach 1 - Cottonwoods Conduits

**Description:** New pipeline to connect LCWTP and BCWTP and for Phase 1 of SLAR.

**Justification:** The Salt Lake Aqueduct Replacement (SLAR) Reach 1 - Cottonwoods Conduits (Cottonwoods Connection) is a new pipeline to connect the Big Cottonwood Water Treatment Plant (BCWTP) and Little Cottonwood Water Treatment Plant (LCWTP) and is in construction. This budget includes only Metro's project costs. Salt Lake City is paying for the Cottonwoods Conduits and 35/145 of the SLAR, which costs are included in the O&M budget.  
Phase III Lite will connect the SLAR into the LCWTP to allow use for finished water delivery.

**Budget:**

**Title:** Salt Lake Aqueduct Replacement Reaches 2 and 3

**Description:** New pipeline to provide resiliency to the SLA and meet contractual delivery obligations.

**Justification:** The Salt Lake Aqueduct Replacement (SLAR) Reaches 2 and 3 will continue the SLAR from Fort Union Boulevard to the Terminal Reservoirs. The pipeline will provide redundancy and reliability to the SLA and allow Metro Water to meet contractual obligations to convey 145 mgd north of the LCWTP. This task is to identify an alignment and pipe size for future design considerations. It is anticipated this project will begin in fiscal year 2025.  
 Early definition of this project will allow District staff to determine appropriate timing and budget.

**Request Type:** Non-Capacity Improvement Project

**Title:** Salt Lake Aqueduct Hardening

**Description:** Preliminary design for replacement and/or slipline of the F/W SLA for seismic stability.

**Justification:** The 2023 Multi-Hazard Mitigation Plan identifies 12 segments of the SLA to replace and 32 segments to slipline with a steel pipe to improve pipeline resiliency. The full replacement and slipline schedules are collectively referred to hardening the SLA. The replacement sections cross and/or closely parallel known fault lines. This project will complete preliminary design to harden the finished water SLA, which includes 11 segments, 3 of which are identified for replacement.

In October 2023, Metro was awarded an aqueduct resiliency grant from the Utah Division of Water Resources which will fund approximately 75% of the project.

**Title:** Little Cottonwood Water Treatment Plant Rebuild

**Description:** Rebuild core portions of the LCWTP for seismic and operational stability

**Justification:** The 2023 Multi-Hazard Mitigation Plan identifies LCWTP Hazard Mitigation as Metro's second-highest priority (after the Finished Water SLA) due to seismic and collapsible soils. The goal of the project is for the LCWTP to withstand a seismic event with minimal damage and return to service within three days of a hazard event. The project will begin in FY2026 and is anticipated to be concluded in FY2033. Work in FY2026 will include a condition assessment of the existing plant and conceptual-level planning. A prioritized list of needs will be developed from which the project will be further scoped before moving into design.

**Department:** Engineering                      **Location:** Little Cottonwood Conduit  
**Project Contact:** Gardner Olson                      **Request Type:** Non-Capacity Improvement Project

**Title:** Little Cottonwood Conduit Replacement and Intake Modifications

**Description:** Improve raw water conveyance from Little Cottonwood Creek to the LCWTP

**Justification:** In recent years, impacts on the Murray penstock and hydroplant prevented Metro from obtaining and treating available Little Cottonwood Creek (LCCr) water. Inspections of the raw water Little Cottonwood Conduit (LCC) in 2011, 2012, and 2015 suggest the pipeline is in poor condition. Hydraulic and operations limitations at the LCCr intake also prevented Metro from capturing creek water. The 2023 Multi-hazard Mitigation Plan states the LCC is susceptible to landslides in its current location.  
This project improves supply reliability from LCCr by replacing the raw water LCC and addressing limitations at the intake structure.

**Title:** Little Cottonwood Water Treatment Plant Administration Campus Improvements

**Description:** Prepare to receive fiber from SLAR-CC and improve Administration Building landscaping,

**Justification:** Metro's server room was constructed in 2001 and has reached its capacity. A solution to update or replace the server room is needed to receive additional fiber connections from the SLAR-CC, MAR, and LCCR projects and effectively position Metro for the LCWTP Rebuild. Current deficiencies, such as HVAC, power, and fire suppression may also be resolved.

Cash Flow Assumptions

**METROPOLITAN WATER DISTRICT OF SALT LAKE & SANDY**  
**CASH FLOW ANALYSIS ASSUMPTIONS**  
**April 14, 2025**

Fiscal year based on July 1 through June 30 of each year. Fiscal Year (FY) 2026 runs from July 1, 2025 thru June 30, 2026.

- 1a Metro Water Regular Operating Expenses:** For FY 2025, the amount shown is the budgeted expenditures expected for June 30, 2025 based on the adopted budget for the period ending June 30, 2025. The amount shown is the budgeted expenditures expected for FY2026. This column does not include Central Utah Project (CUP) costs shown in columns 4 and 10, depreciation, amortization, or interest expense. There is an assumed 3.0% annual increase for future years. This assumed increase is based on a 12-year average of Metro Water-controlled expenses.
- 1b. Metro Water Non-Routine Operating Expenses:** The amount shown is the budgeted expenditures expected for FY2026. The column includes non-routine projects and those projects that do not qualify as capital budget expenses forecasted for next 4 years. There is a cost escalation of 2.00% starting in FY30, based on previous 5-year average, for future years.

## I. Background

### How Metro Water’s budget differs from the Member Cities

- Metro Water checks the various sources to ensure Metro Water is in line with the market, e.g., Consumer Price Index, World at Work, Tech Net, and other related sources.
- When setting the increases, a comparison is made with the two member cities and other local water districts.
- SLC being self-insured can add medical benefits Metro Water cannot competitively match due to the difference in the number of employees; therefore, Metro Water focuses on other fair benefits.
- Metro Water believes in giving merit increases and tying COLA to merit. A 1% merit increase represents about \$75,400 (based on FY2026 budget for salaries and wages, less payroll taxes).
- Ultimately, we are governed as separate entities and each Board or City Council must do what they think is in the best interest of their employees.

## II. Staffing Levels

The chart below reflects the current and projected staffing levels.

Department	Cost Center	FY2025	FY2026	FY2027 (anticipated)	FY2028 (anticipated)	FY2029 (anticipated)
Administrative	10	9	10	10	10	10
Operations	22	12	13	12	12	12
Maintenance	23	24	25	25	25	25
Information Technology	24	10	10	10	10	10

Lab	50	6	6	6	6	6
<b>Totals</b>		<b>79</b>	<b>84</b>	<b>84</b>	<b>86</b>	<b>86</b>

The projected staffing levels in FY26 include an increase of four full-time equivalents (FTEs) and one temporary increase. The increased staffing levels will address workload and succession planning needs at Metro Water.

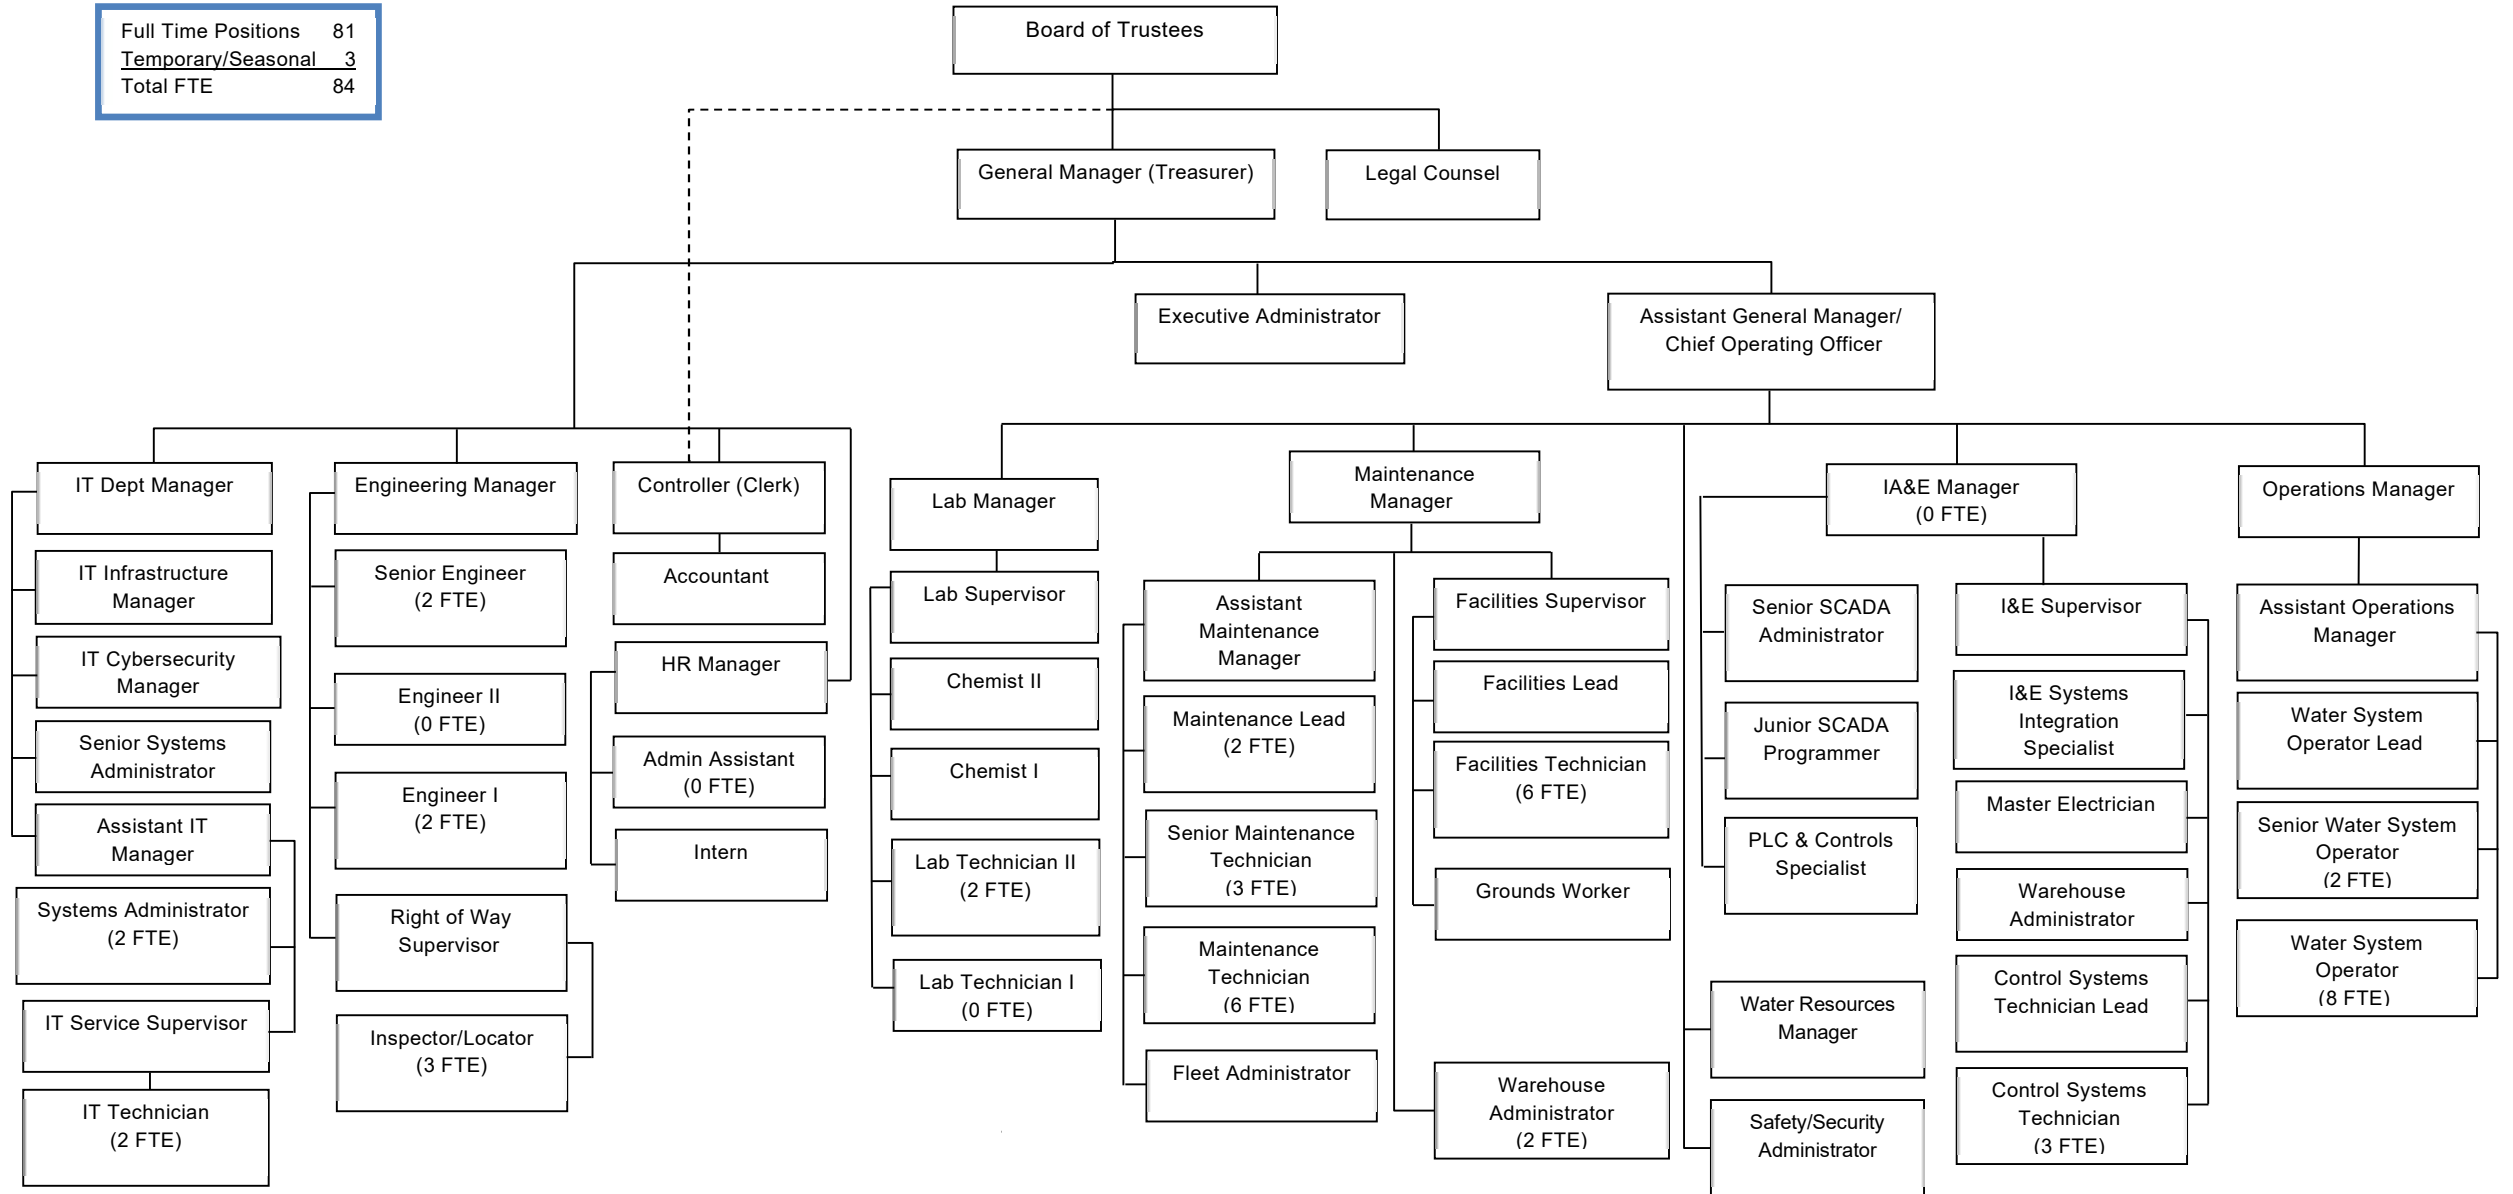

The Operations Department requires 12 FTEs; however, in anticipation of a retirement in FY27, there will be a temporary increase to staffing levels in FY26 to allow a full year of training before the current employee retires. An additional FTE will be added to the Administrative Department as a permanent increase to address safety and security needs. An additional FTE will be added to the Maintenance Department as a permanent increase to manage workload. An additional FTE will be added to the Engineering Department as a permanent increase to address succession planning and upcoming capital projects. An additional FTE will be added to the Industrial Automation & Electrical Department (formerly the Instrumentation & Electrical Department) as a permanent increase to address SCADA system needs. Future anticipated needs

of Metro Water are estimated to add one FTE in FY28 to the Engineering and Industrial Automation & Electrical Departments.

Attachment A represents the proposed staffing levels for FY26.

The Tier II contribution rate is 14.19%, a decrease from the prior year. The current split amongst our employees between the two tiers is as follows: 42% Tier I; 58% Tier 2.

Metro Water encourages employee wellness through a Participatory Wellness Program (PWP). The PWP provides an incentive for participation and is available without regard to an employee's health status. Employees who participate would receive \$500 in their HSA in 2026. The PWP incentive requires an employee to complete at least four of the eight available options before November 14, 2025. These options include the following: (1) flu shot, (2) preventative exam with personal physician, (3) biometric screening, (4) COVID or other age appropriate vaccinations, (5) wellness challenge participation, (6) attending a lunch and learn, (7) Dexa Body scan, and (8) age/gender/risk-appropriate screening with a personal physician.

### **IV. Job Grades & Salary Ranges**

Metro Water has a traditional pay structure with job grades and salary ranges for all positions. A 2% salary structure adjustment has been incorporated for FY 2026 for the non-management pay structure and the information and operational technology pay structure. Adjustments are based on the information compiled from the 2024 AWWA Compensation Survey and the 51<sup>st</sup> World at Work Annual Salary Budget Survey. The salary adjustment shifts the midpoint of the salary range and would maintain the Metro Water's position to provide competitive compensation.

Metro Water is proposing the following new position titles: Inspector/Locator, Fleet Administrator, Chemist I, Chemist II, Safety/Security Administrator, Junior SCADA Programmer, Senior SCADA Administrator, and Industrial Automation & Electrical Manager. Two of these positions represent an increase in FTEs while the remaining are a change in position descriptions or new roles that do not result in additional FTEs.

### **V. Skill-Based Pay**

Metro Water continues to support a skill-based pay program to allow workforce flexibility and cross-training. This program has been successful by encouraging employees to learn additional skills in order to increase their productivity and efficiency. Skill-based pay is given based upon increased knowledge, skill, and ability. Employees who participate in the skill-based pay program receive their hourly wage and an additional skill-based pay for those successfully obtained skills.

As part of the FY26 budget, Metro Water includes \$5,200.00 in salary and wages to support the program. The program will be expanded to include compensation for employees performing instrumentation calibration and welding.

## Staffing and Compensation Schedule

### VI. Wage and Salary Statistics

Historically, Metro Water utilizes a merit pay system or pay-for-performance system to determine wage and salary increases. Metro Water compares wage and salary increases with the member cities and other water districts. Metro Water also evaluates the Consumer Price Index and Employment Cost Index from the U.S. Bureau of Labor Statistics. Wage and salary information are evaluated from the 51st Annual Salary Budget Survey 2024-2025 by World at Work and 2024 AWWA Compensation Survey (Large).

Based on these data points, Metro Water is proposing a 4% merit increase for FY 2026. This represents the amount budgeted based on current salaries and wages, but does not necessarily mean an employee would be eligible for a 4% merit increase. The following table details the comparisons with member cities and other water districts:
